Val,

The attached is our responses to both your and Reid's earlier comments on Section 6 of the NESHAP subpart W report. We have left it in the track mode so you can readily review our proposed changes and responses to your comments. If you could let us know as soon as possible if we have adequately addressed your comments we will move on to the next stage and put the entire BID/EIA report on subpart W into the final stage.

Per our conversation last week hopefully you've also had the opportunity to review the initial report we submitted on the EIA review of 40CFR192 (Task 2B). Please send any comments or instructions you have on that document as soon as possible so that we can address it for you as well.

Harry
